

# How to complete the Online Career Videos

(At the end are the video settings and ways to solve an error message).

## Brief Overview

1. Log on to your AKCIS profile to watch one video about each of your Dream Jobs or the AKCIS Jobs listed for you in your Occupation Sort.
2. Then watch a video that is related to your Dream Job or AKCIS Job Sort.

For example, if my Dream Job was to be a Camera Operator then I would watch a video for a job that is **"RELATED"** to that career. AKCIS will help you find a job related to your Dream Job or AKCIS Job.

See box below.

### Related Occupations

#### Camera Operators

- Audio-Visual Specialist
- Broadcast Technicians
- Film and Video Editors
- Photographer

3. You may also watch Videos at

[http://www.careerinfonet.org/videos/COS\\_videos\\_by\\_cluster.asp?id=27&nodeid=28](http://www.careerinfonet.org/videos/COS_videos_by_cluster.asp?id=27&nodeid=28)

## Login

Click the picture below to get to the web site.

<https://akcis.intocareers.org/loginmain.aspx?ReturnUrl=%2fdefault.aspx&cookieTest=y>

# Step 1

The screenshot shows the AKCIS Junior website interface. At the top left is the AKCIS logo with the text "Alaska Career Information System Junior". To its right is a navigation menu with links for "[ Text Only | My Portfolio | Log out ]" and a "Quick links" dropdown. A prominent blue link reads "Click here to go to the main AKCIS Page".

The main content area features a large illustration of three cartoon characters in a city setting. A girl on the left asks "Who am I?". A boy in the center asks "Where am I going?". A man on the right asks "How do I get there?". A series of blue arrows points from the man's question towards the right-hand navigation menu.

The right-hand navigation menu includes a "Global Search" box with a "GO" button. Below it, a red banner identifies the user as "AKCIS Jr. - Soldotna Middle School" and says "Welcome, Shelli". A "Rockin'" icon with a guitar is next to a link "Go to 'My Portfolio'". Below this is a note: "Use KPBSD: Soldotna Middle School version".

A green header "Additional Resources" is followed by a list of links with icons: "Tools for users", "Tools for counselors and teachers", "Tools for parents", "Glossary", and "Alaska Performance Scholarship".

At the bottom of the page, there is a footer with copyright information: "©1971-2011 University of Oregon. All rights reserved. Created by intoCareers, a unit of the University of Oregon. Labor market information is public information provided by the Alaska Department of Labor." and a navigation menu: "[ About | Tech Support | Privacy Statement | Terms for Use | Comments ]".

#### Overview

Camera operators use motion picture, TV, or video cameras to film a wide range of subjects.

There are many people involved in making a movie. Of course, there is the director, the actors, and the producer. There are also the sound professionals, the assistants, and the editors. In some movies, there are stunt people and a special effects crew. But what about the camera operators? They are the ones who actually "shoot" the film. In some ways, we see the movie through their eyes. They are the ones guiding the camera over the action, recording it for us so we can view it in the theater.

Camera operators film movies, documentaries, and music videos. They film news events, training sessions, and special events. Camera operators work in a variety of settings. They work for independent TV stations, large cable or TV networks, or small production companies.

Many camera operators work in the entertainment field. Some film large budget movies. Others specialize in cartoons or television shows. Camera operators who film movies often move while filming. They use cameras in any of several different camera mounts. For example, the operator may stay in place and shoot whatever passes in front of the lens. The camera may also be mounted on a track, and the operator may move the camera along the track to shoot from several angles. Sometimes operators sit in cranes and follow the action while crane operators move them into position.

Steadicam operators wear a harness and carry the camera. This provides a steadier picture while they move about the action. In contrast, camera operators who work in studios usually film from a fixed position.

#### At a glance

- Have a good "eye" and artistic ability
- Film everything from movies to videos to weddings
- Work with directors, technicians, and subjects
- Work under bright lights
- May work long, irregular hours
- May travel to work on location
- Most learn the job through college training
- About 26 percent are self-employed
- Earn \$39,380 per year (Alaska median)

**Review**

roadcast technicians record or broadcast radio and television programs.

roadcasting live is often a risky endeavor. TV anchors can have a coughing fit, or worse, a laughing fit. Interviewees may not even speak the same language as the reporter (as was the case during one BBC broadcast). Sometimes live broadcast "guests" don't want to cooperate under the hot lights and cameras.

With all the examples above, it's usually what is in front of the camera that is the biggest variable. The cameras and equipment themselves usually work just fine - all thanks to the technicians who work behind the scenes.

Most broadcast technicians work for radio and TV studios. They are in charge of the equipment used to record and broadcast radio and television shows. This equipment includes microphones, cameras, and tape recorders.

**View Video**

**At a glance**

- Work with microphones, cameras, tape recorders, and control panels
- Some specialize in audio or video
- Sometimes work on location, but mostly work indoors
- May work evenings and weekends
- Usually train
