Feel free to watch any video that doesn't have
a lesson described in the narrative below.
The ones with red boxes would be my first choices.

Predator	In this dramatization a young boy meets a new friend online. When the two arrange a face-to-face meeting the boy finds out that his "friend" is really a cyber predator.
Soccer Girl	This video illustrates the importance of protecting personal information online. A teenage girl discovers that what she says in normal online conversations with friends can lead anyone right to her front door.
Christina Long	Classmates talk about their friend in this true-life story that documents a teenage girl's online relationship which led to a face-to-face meeting with a cyber predator. Teacher advisory: this video contains sexual references and the death of a teenage girl.
What is Cyber Bullying?	Students talk about cyber bullying, and in this unique peer-to-peer video they offer tips about how to avoid online bullies
The Cyber Bully	There was a time when instructional videos were simplistic, shot in black and white and now seem out-dated and cliché. This comedic video borrows the formula from those days for this cyber bullying awareness training video.
Ryan Halligan	This true-life story documents the online bullying that led up to the suicide of a teenage boy. Teacher advisory: the tragic nature of this story makes this video inappropriate for elementary and middle school students.
Pool Party	Many students believe that social networking online is much like other group interactions, such as a pool party. This video shows them the difference and helps students be aware and avoid online dangers.
The Chills	To an outsider, social networking Web sites seem to have created a language of their own. In this spoof of network TV shows aimed at teens ("The Hills"), this video reveals how much users are comfortable conversing to each other in this language.
Social Networking	This On the Download news report covers the topic of social networking, including interviews with students and safety tips
Donny the Downloader	Donny likes his skateboard, hanging out with friends, and listening to music. He's not a bad guy. The animated character just doesn't understand why it's illegal to download music from the Internet without paying for it. This is an animated short story.
i-MENTOR PSA	Student i-MENTORS developed their own concept, wrote the script, and then produced a public service announcement as a video project following their lesson on illegal downloading and file sharing. Sounds like a good project for students at your school!
Derek's Story	This true-life story documents the activities and consequences of Derek, a college student who's paying the price after being convicted of illegally downloading music.
IP Theft: Groundlings	The comedy troupe, "Groundlings" performs a skit that makes its audience laugh in a way to show the sad consequences that illegal downloading has on a musical artist.
Downloading	In this On The Download online newscast, students receive up-to-date information on the topic of music piracy.
Malicious Code	What is a computer virus? What are worms and Trojan horses? How do they get into your computer? And, most importantly, how can you protect your PC?
Cyber Security Tips	Students offer their own tips about how to best safeguard computers and data from malicious attack.
Your Computer is Your Castle	Fortifying your computer against malicious attacks is a modern-day problem. However, the best defense against worms and viruses is taken right out of medieval times.
WiFi	WiFi makes connecting to the Internet convenient in public places. The problem is keeping your private wireless connection private.
