

# Regions of the World

You may have heard about an earthquake in Southeast Asia, a famine in Sub-Saharan Africa, a tidal wave in the Pacific Region, or a war in the Middle East. But do you really know where these regions of the world are and what countries are in them?

Anglo America means English Speaking America.

Spanish is derived from the Latin language so Latin America means Spanish speaking America.

Sub means under so Sub-Sahara means below the Sahara Desert

The Pacific Region are the islands that touch the Pacific Ocean.
